

OLD LLOYDS TSB BUILDING

The former Lloyds Bank building which is currently for lease, sits within the evolving Edgbaston Village which offers a rich choice of leisure and retail facilities along with a wide selection of restaurants and bars.

A building sitting within a prominent position, aesthetics is paramount hence, S Wallace Developments were contracted to reroof the building, this was a specification that needing a flat roofing product that could work on a multitude of surfaces and conditions.

For a roof such as this with a vast amount of detail work the Flexiglass 2022 GRP Multi Surface Overlay System was the only product on the market for this application, Cromar Building Products Regional Manager Danny Wall says "Flexiglass was recommended due to its abilities to cover most surfaces, the quick drying time, the strength & durability of the product. The Flexiglass is able to withstand heavy impact from falling slates foot traffic. This enables ongoing construction works onsite to continue with the confidence throughout the project".

Supplying the product via EH Smith Builders Merchants in Sutton Coldfield, the roof was estimated at 300sqm. S Wallace Construction have undergone our customer training experience for the Flexiglass and are certified to install. Steve Wallace from S Wallace Construction remarks "The Flexiglass 2022 Multi Overlay System was just the product for this job, we shall be using it again".

Mark Cleasby from EH Smith says "We have had great service from Cromar Building products, Both EH Smith and S Wallace Construction are happy with the product and will use on future projects".

The site also featuring one of our breather membranes from our VENT 3 range truly shows how diverse roofing works can be.
