

QUICK SELF STORAGE NEED A QUICK SEALING

Why Choose Hydrosil?

The Hydrosil Waterproof Roof Coating is a liquid-applied silicone roof coating that offers excellent UV resistance, fast curing, and a watertight finish. One of its main advantages is that it becomes safe for foot traffic within 24 hours, providing significant flexibility for construction companies to continue works according to their schedule.

Exceptional Support and Service

Ryan O'Connor, the Roofing Manager at Beesley and Fildes, shares his perspective: "Dave approached me with a large project, and I suggested using Hydrosil, knowing it's an outstanding product with a 10-year guarantee. I contacted Gareth, our representative, and placed an order for 90 tins. Cromar delivered the order within a few days, demonstrating excellent service and making our customer very happy".

Choosing the right roofing material can make all the difference in the success of a project. As demonstrated in this example, Cromar's Hydrosil offers a reliable, effective, and efficient solution for roofing projects of any scale. Cromar's Hydrosil: A Reliable Solution for Roofing Projects

When it comes to roofing projects, choosing the right materials is vital for success. Among the plethora of options available in the market, Cromar's Hydrosil Professional Acrylic Roof Coating stands out for its superior performance and reliability. Let's delve into a real-life example of how this product has proven its effectiveness in a recent project undertaken by Keda Construction.

Our Regional Sales Manager, Gareth Kitchen, who maintains a strong working relationship with merchant Beesley and Fildes, recommended the use of Hydrosil for a large-scale project. Working in close collaboration with Ryan O'Connor, the Roofing Manager at Beesley and Fildes, they supplied approximately 2000sqm of Hydrosil Silicone Roof Coating for the project.

Real-Life Success with Hydrosil

Dave from Keda Construction shares his experience with Hydrosil: "Following discussions with our supplier and an initial survey, we decided to use the Cromar product, Hydrosil Pro Grade. Despite interruptions due to weather, the product, once mixed correctly, was surprisingly easy to apply and exceeded all our expectations in terms of ease of use and coverage. The project was completed well within the time allowed, even with weather-related breaks. I would not hesitate to recommend this product and plan to use it in future projects".
