

# TECHNICAL DATA SHEET

## POWDER MORTAR TONE

Issue 2 – November 2015

- Description:** Powder Mortar Tone is a permanent Oxide Powder cement colouring.
- Application:** To produce full strength colour use 1/2kg Powder Mortar Tone to 10kg of cement. Reductions in amount of Powder Mortar Tone used will reduce colour strength. For 50kg bags of mortar or mortar mix 1/2kg of colour is sufficient. For fine course mixes 20% less colour will achieve a similar strength. Add colour to dry mix and disperse prior to adding clean water. In order to achieve consistency of colour to each mix use the same grades of cement, sand and aggregates, variations will affect the final colour. Iron oxide pigments conform to BS EN 12878:2014.
- Colours:** Black, Red, Brown, and Yellow
- Storage:** Store in dry conditions for an indefinite shelf life.
- Health and Safety:** Please refer to the Health and Safety Data Sheet on Powder Mortar Tone.
